

SOLASTRIP STRIPPER

Floor Polish Stripper

Solastrip Floor Polish Stripper is specially formulated to remove old emulsion finished easily and efficiently from all types of flooring. Solastrip's low foaming properties enable the user to agitate the floor with a floor machine without producing excessive suds and foam. Formulated to help safeguard the well being of its operatives and clients by avoiding too much exposure to solvents and aggressive chemicals.

- Specially created to remove old emulsion floor finishes
- No ammonia
- Low foaming
- Removes all types of floor polish
- Can be used with a floor machine
- Can be used on most floor surfaces

APPLICATION

Dilute 1:10 parts with water and apply to the emulsion surface that is to be stripped.

Allow a few minutes for Solastrip Floor Polish Stripper to soften the old emulsion.

Scrub with a floor machine fitted with a nylon stripping pad.

Pick up slurry with a wet vacuum cleaner or mop and rinse thoroughly.

Solastrip Floor Polish Stripper is corrosive and could cause burns, use with caution.
